Familiar: 3D Level Design, HTML, CSS, C#, JavaScript, Canva, UI/interface design

Language: Korean (intermediate)

EDITING & MEDIA EXPERIENCE

Marketing & Media Intern

May 2025 - Jul 2025

Daebak (Korean culture subscription brand) via CRCC Asia Global Internship Program

Seoul, South Korea

- Tasked with reviving the brand's public image after a period of customer backlash, served as producer, scriptwriter, videographer, and editor for its official apology and comeback teaser videos (CapCut, Canva) — published across all official channels as the centerpiece of the company's revival campaign.
- Produced short-form TikTok/Reels content and SEO-optimized blog articles on Korean culture, shopping, and esports targeting Gen Z audiences.
- Contributed to a company-wide rebrand, including new subscription box design, color scheme, and company design.

Silent Film Sound Design (DS 344)

March 2026 - April 2026

Group project · Premiere Pro · Class project

Michigan State University

- Produced the final minute of a 3-minute re-scored silent film: sound design, sync, pacing, and edit for my segment of the project.

The Enigma Tapes — Beacon of Youth — [Released on Spotify](#)

February 2026 - April 2026

Narrative audio story · Group project · Adobe Audition · Class project

Michigan State University

- Producer, scriptwriter, voice actor, and sound designer for a narrative audio story published to streaming platforms.

GAME PROJECTS

Gravity Tower — [Published on itch.io!](#)

March 2026 - April 2026

Unity · C# · 2D platformer · Partner project

- Designed and shipped a gravity-flipping 2D tower-climb platformer: core mechanic design, level design, programming, and release.

Raiden SNES Clone— [Published on itch.io!](#)

April 2026 - May 2026

Unity · C# · 2D shooter · Class project

- Built 3D levels and created custom enemy and weapon animations; designed levels that iterated on mechanics introduced in prior stages.

Galactic Protector — [Published on itch.io!](#)

February 2024 - March 2024

Unity · C# · 2D · Class project

- Developed a Space Invaders inspired open 2D-shooter, building enemy waves and level structure.

Space Training — [Published on itch.io!](#)

March 2024 - April 2024

Unity · C# · 2D platformer · Class project

- Created a space-station platformer with basic movement; designed every level's layout and difficulty curve.

Space Pests

April 2024 - May 2024

Unity · C# · 3D platform shooter · Class project

- Built 3D levels and created custom enemy and weapon animations; designed levels that iterated on mechanics introduced in prior stages.
